New Look and Feel

Welcome to openSUSE.org

The openSUSE project is a worldwide community program sponsored by Novell that promotes the use of Linux everywhere. The program provides free and easy access to openSUSE. Here you can find and join a community of users and developers, who all have the same goal in mind — to create and distribute the world’s most usable Linux. openSUSE also provides the base for Novell’s award-winning SUSE Linux Enterprise products.

Getting openSUSE

Download version: openSUSE 10.3 [Announcement]
Download version: openSUSE 10.2

FOSDEM 2008

On February 23-24 it's again FOSDEM - time in Brussels. The openSUSE team will have a developer room with 2 days full of interesting talks and a booth. Your chance to meet with openSUSE and other project teams! For more information and the openSUSE schedule checkout FOSDEM.org.

Participate in openSUSE

Whether you’re an experienced Linux developer or an end user just getting started with Linux, there are many ways to participate in the openSUSE project. Development version: openSUSE 11.0 Alpha 2 [Announcement]

OBS Webclient Redesign
Color Code

Wiki [https://en.opensuse.org]
Keywords: hope, rests, nature

Software [https://software.opensuse.org]
Keywords: fun, energy, action, warm, connectivity

Build Service [https://build.opensuse.org]
Keywords: neutral, sober, industrial

User Directory [https://users.opensuse.org/]
Keywords: trust, serious, harmony
Planned Changes

- Make the client a starting point for learning packagers
- Easier way to see the status of packages
- Don’t show actions which can’t be executed due to lacking permissions
- Guessing the projects/packages a certain user wants to work on
- Make certain actions on projects available when editing a package
- When possible, use inplace editing instead of linking to a dedicated edit page
